

THE NEW EXCLUSIVE PROMOTIONAL PACKAGES FOR 2026

For workshops and assembly.

For doers. With added value. True Lorch.

QUALITY – MADE BY LORCH AND IN GERMANY.

Quality where it is needed.

Lorch systems are designed for practical use. Quality on the construction site – just like in the workshop. Every Lorch product embodies more than half a century of experience. That is the knowledge of the best function. The best operation. And the best welding results. A maximum of three steps and you are welding perfection. You do not have to adapt to the Lorch system; it adapts to you.

Only people who live quality can create quality.

For us, quality is a matter of honour and decency. When developing and manufacturing welding equipment, we are a bit like professional mountaineers: we always choose the highest of all goals. Then we mobilise all our experience, skill and ingenuity to achieve this highest of all goals – quality. That is our promise to you. So that you can work better and produce quality more easily yourself. Because even today, only truly genuine craftsmanship can earn you good money.

The quality of your work improves with the quality of your equipment.

A good welding system consists of up to 700 parts, each of which is of crucial importance. Only then does the great art of fine-tuning come into play. You can't tell whether a welding system is top-notch or rubbish just by looking at it – you have to weld with it. Unless it's red and comes from Lorch.

Guarantee? Of course!

Quality as required in industry. That is why we call it the Lorch industrial guarantee. Because our systems meet the highest standards here, including for workshops and assembly.

3 YEARS
INDUSTRIAL
WARRANTY
LORCH

3 times longer than required by law.

Currently, the law requires a one-year warranty for commercial use to cover material and manufacturing defects. We can easily comply with this requirement based on our understanding of quality. If the equipment is used properly in accordance with the operating instructions, you will receive a one-year warranty from the date of purchase and two additional years free of charge. However, please tell us who you are and where our equipment is being used.

5 years on main rectifiers and transformers.

What other manufacturers consider worth mentioning as an extra feature has long been a reality at Lorch. Quality can be found in every component, from the smallest to the largest, all of which are 'Made in Germany'. For selected components in our systems, such as main rectifiers and transformers, we go even further and offer you a five-year warranty.

10-year spare parts guarantee.

We guarantee the availability of spare parts for at least ten years after the production of your Lorch device.

3-year warranty? Guaranteed upon registration!

We not only promise you quality, we are also 100% convinced of it ourselves. That is why we give you a full three-year manufacturer's warranty when you register your product in the name of the end customer. That is 1095 days. Or even 1096, if there is a leap year. During this time, we guarantee the functionality of our products. We are confident that not much can go wrong with a system or device bearing the Lorch name. However, should a warranty claim arise within three years of registration, our technical service team will work with our local service partners to find a quick solution. Guaranteed.

Please register in the name of the end customer immediately after purchase.

Registration allows us and your service partner to know where the product is located, what type it is and how it is equipped. This enables us to provide our additional warranty service in the best possible way. If the Lorch product has not been registered within 30 days or in the name of the end customer, we cannot fulfil this three-year warranty and will grant the statutory period of one year. We have described our warranty service clearly and transparently for you in a brochure that is included with every new Lorch system. Immediately after registration, you will receive your warranty certificate, which is valid for three years from the date of purchase.

EVERWHERE. CONVINCING. SUPERIOR.

The MicorStick-Series.

Still possible:
the improved electrode inverter.

We have registered the patent that significantly improves the life and work of our welders: MicorBoost technology! This is what our customers expect from us.

Our MicorStick series is the best and most affordable we have ever had. Whether in the workshop or on site, the MicorStick makes work easier, faster and better.
This is how you can make money welding.

For doers. With added value. True Lorch.
The new exclusive Lorch promotional packages.

Amazing! Now up to **48%**
promotional discount!

MicorStick 160 BasicPlus for the workshop

MicorStick 160 BasicPlus,
Accessories 25 mm²: 13 mm plug, 3 m workpiece cable,
3 m electrode cable, welding shield, slag hammer, wire brush

Instead of € 996,00 **now only**
€ 516,00¹ for the promotional price.

Order no. 111.7062.0 (PG SA)

- 48%

MicorStick 160 BasicPlus for the assembly

MicorStick 160 BasicPlus, Protective tool case
Accessories 25 mm²: 13 mm plug, 3 m workpiece cable,
3 m electrode cable, welding shield, slag hammer, wire brush

Instead of € 1.119,00 **now only**
€ 634,00¹ for the promotional price.

Order no. 111.7063.0 (PG SA)

- 43%

MicorStick 180 ControlPro for the workshop

MicorStick 180 ControlPro AR,
Accessories 25 mm²: 13 mm plug, 3 m workpiece cable,
3 m electrode cable, welding shield, slag hammer, wire brush

Instead of € 1.455,00 **now only**
€ 985,00¹ for the promotional price.

Order no. 111.7064.0 (PG SA)

MicorStick 180 ControlPro for the assembly

MicorStick 180 ControlPro AR, Protective tool case
Accessories 25 mm²: 13 mm plug, 3 m workpiece cable,
3 m electrode cable, welding shield, slag hammer, wire brush

Instead of € 1.578,00 **now only**
€ 1.103,00¹ for the promotional price.

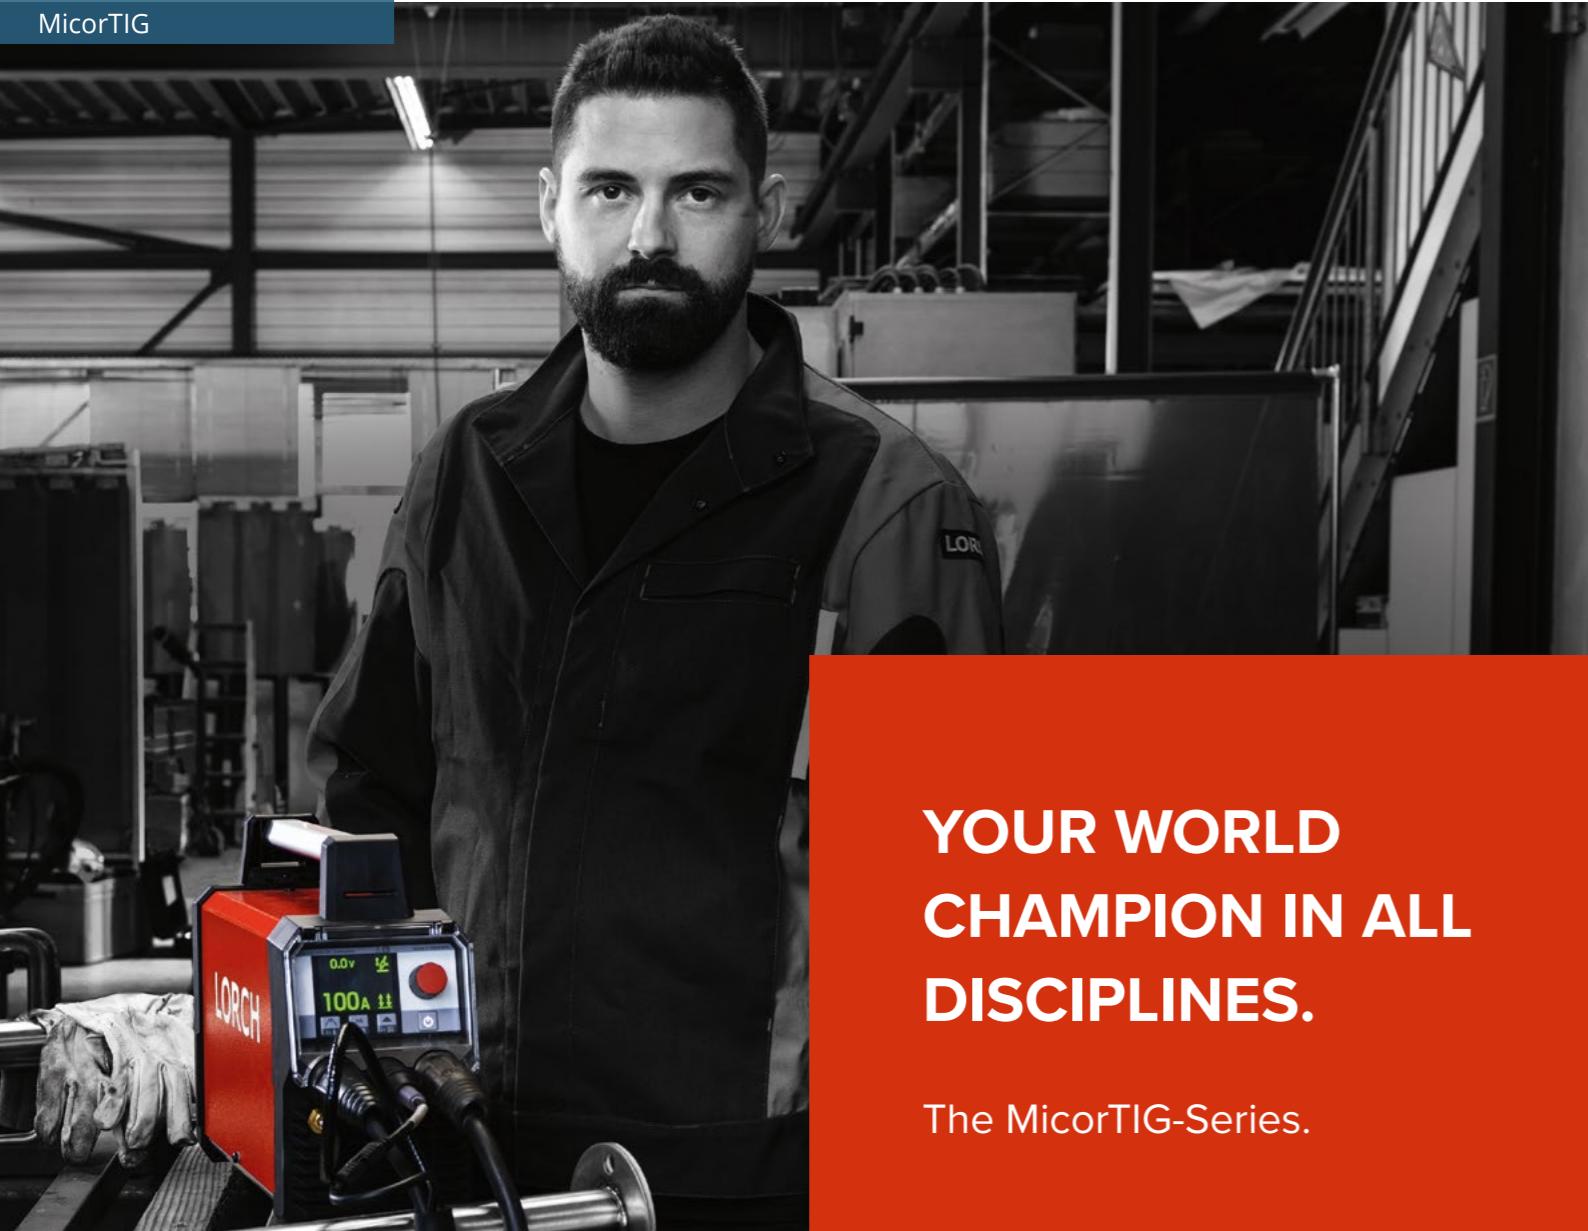

Order no. 111.7065.0 (PG SA)

- 30%

This flyer is aimed exclusively at professionals. Lorch products are only available from authorised specialist dealers.
The promotional prices are valid from 01.02.2026 to 31.12.2026. While stocks last - subject to prior sale.
All prices are without VAT.

¹ All package prices are subject to necessary material surcharges. You can obtain the currently valid package price via the QR code.

YOUR WORLD CHAMPION IN ALL DISCIPLINES.

The MicorTIG-Series.

**State-of-the-art high-tech electronics –
uncompromisingly compressed.**

The best mobile TIG DC system we have ever built. Now everyone has to measure themselves against it!

With the MicorTIG, we have combined all our TIG experience and the boldest wishes of TIG welders with the latest technology in the most compact design. The declared goal: 200 A of the most demanding TIG DC welding with all functions. Absolutely mobile and easy to operate. For the professional TIG welder, but also for the occasional welder. Our development department took up the challenge and worked hard to surpass itself. The result is the ultimate TIG system for assembly work, but also for the workshop. For steel and stainless steel. Whether railings, handrails, containers, flanges or covers. Whether production or repair and, most importantly, with or without a socket on site.

The MicorTIG clearly improves the lives and work results of the world's TIG welders.

WELDS ALUMINIUM AND STEEL. EVEN IN THE MOBILE VERSION.

The HandyTIG AC/DC-Series.

The compact all-rounder for aluminium and stainless steel.

Anyone who can do any job anywhere professionally can rightly call themselves an all-rounder. The HandyTIG AC/DC feels just as at home in a workshop as it does on site. Only the welder feels only the welder feels more comfortable. Because its professional welding system from Lorch makes it extremely easy for him to weld perfect seams.

Alternating current (AC) is required for aluminium TIG welding. As aluminium is a very good conductor of heat, every millimetre of material thickness requires more current. For this reason, there is the HandyTIG 180 AC/DC for aluminium up to 5 mm thick and the HandyTIG 200 AC/DC for aluminium up to 8 mm thick. Both for the 230 V mains.

So nothing stands in the way of your success. In apparatus engineering or sheet metal processing with a fixed workstation or on the move for repairs, maintenance and final assembly: The HandyTIG AC/DC delivers top performance - always and everywhere. A large industrial TIG welding system can do no better. And you certainly don't want to lug it to the next construction site.

For doers. With added value. True Lorch.
The new exclusive Lorch promotional packages.

The latest generation for your workshop.

Just the right compact welding systems for harsh use in practice: A robust housing, coupled with smart inverter technology, brings MIG-MAG perfection to industry standards into your workshop. The R-series is the ideal partner for any welding tasks in workshop and light fabrication.

As a special feature, the system remains easy to operate, offering many setting options for clean weld seams without requiring any rework.

Perfectly adjusted welding programmes are available for all common applications in workshop and light fabrication. No matter the material-wire-gas combination chosen, the R-series can weld on the highest level. It supplies the best arc for any material, even if aluminium or stainless steel are welded instead of steel, or if flux-cored wire or brazing tasks are at hand.
